

# **fox** for FLIGHT SCHOOLS

With over a decade of experience in aviation training management systems, trusted by the industry's key players, Britannica Knowledge Systems provides a scalable and comprehensive solution from training development to billing.

Fox boosts operational and financial efficiency, enables resources utilization, improves training quality and assures regulatory and safety standards are met.

With quick onboarding and full integration with your existing IT systems, Fox for Flight Schools is an affordable solution for flight schools worldwide.

## Training Development & LMS

Define student tasks and competencies.  
Manage training and testing materials,  
e-learning sessions and feedback forms.

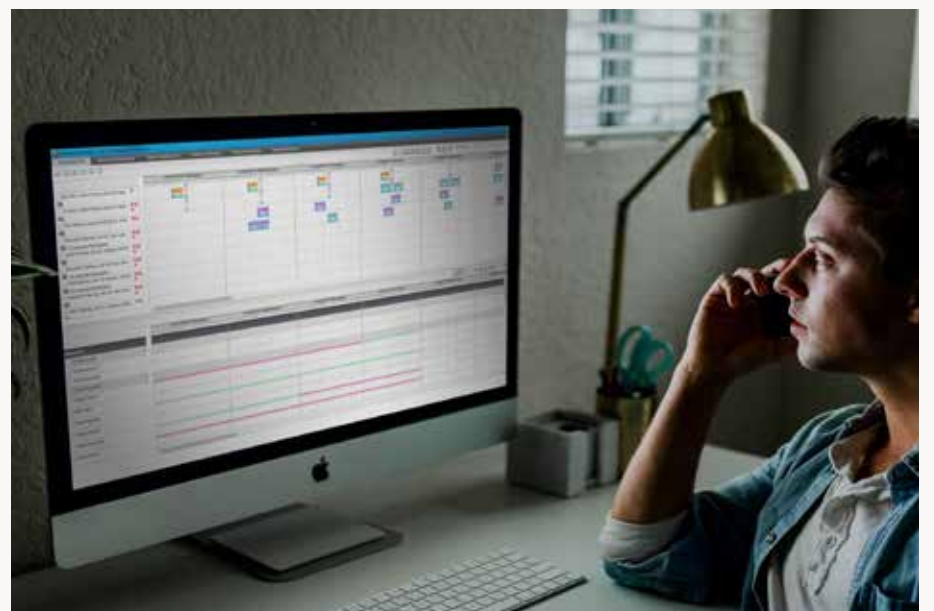

## Resource Management

Increase efficiency and reduce costs.  
Manage instructor availability and  
airplane maintenance.

## Scheduling

Enable short term planning and respond  
quickly to ad-hoc changes by coordinating  
instructor and aircraft availability  
on a single screen.

## Qualification & Risk Assessment

Monitor instructor qualifications and manage  
renewals, ensuring only qualified instructors  
are scheduled. Calculate instructor and  
student safety and risk assessment level.

## Dispatch

Capture and monitor all aircraft and flight check-in and check-out data, such as engine hours and mechanical issues.

## Grading

Mobile app enables evaluators to complete evaluation forms in real time, synchronizing the data automatically upon landing, assuring fully completed forms and saving time.

## Flight Logbook

Capture and export pilot logbook data automatically in Fox, ensuring accuracy and accessibility, while also saving time.

## Student Tracking

Document all student training data and easily track student training progress.

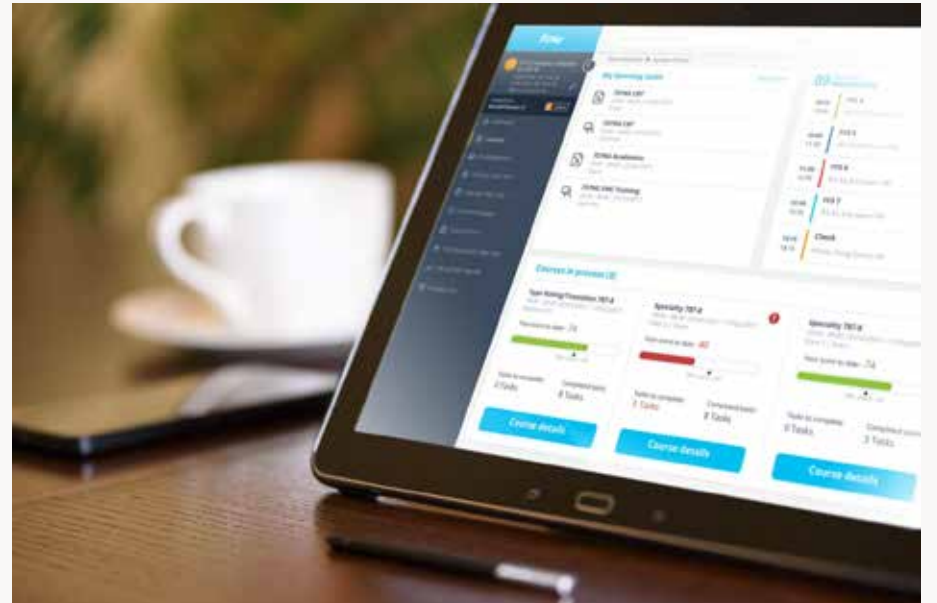

## Integrations

Fox's enables full data integration with any existing systems such as billing, maintenance, HR and more.

## Finance

Define fixed and varied pricelists, manage dry lease contracts, track training hours, produce financial reports and provide accurate information to your billing system.

## Reports & Analytics

Enable your team to manage KPIs for revenue, expenditure, performance and customer satisfaction. Customize reports for different departments, roles and permissions.
